

CYPRESS BEND RV RESORT

Utility Extension Project

Project Update

September 2026

The existing sewer lift station has been upgraded with new pumps, new three-phase power source, and new control panel and is now owned and operated by Lee County Utilities. The new water main has been in service since 5-12-26. The wastewater treatment plant has been totally removed and the percolation ponds properly abandoned by removing the organics from the pond bottoms, backfilling with clean soil, and sodded with Bahia grass. The temporary construction entrance to Estero Parkway has been removed. Currently the project is in the final paperwork completion status for final closeout.
